I, Jesus Corona, declare:

1. I am one of the named plaintiffs in this action. I have personal knowledge of the following facts and, if called upon as a witness, could and would competently testify thereto, except as to those matters which are explicitly set forth as based upon my information and belief and, as to such matters, I am informed and believe they are true and correct.

- 2. I am writing this declaration in support of Plaintiffs' Motion for Final Approval and Motion for Fees Costs and Incentive Award in the above-captioned action.
- 3. In my declaration in support of Plaintiffs' Motion for Preliminary Approval, I explained why I believe that this settlement is a fair and reasonable result for the Class.
- 4. The adequate notice and positive response of the Class reinforces my position during preliminary approval that this Settlement Agreement is one that is fair and reasonable to the Class and that I have acted as an adequate representative.
- 5. After being informed by my attorneys of my responsibilities as a class representative, I believe that I put the interests of the class members before my own and will continue to do so. Throughout this case, I believe that I served as an adequate class representative.

6. I knew that by filing the class action complaint, I might have an obligation for some or all of Defendant's legal costs if the case was not successfully litigated. Even knowing the pitfalls, I was not scared to stand up for what I believe is right, however, I was concerned about the possibility of losing and having a judgment filed against me for costs if we lost the case.

7. During the pendency of the litigation, I spent considerable time searching for documentation relating to the class action and also reviewing documents and settlement papers. I worked extensively to assist with the lawsuit, and by providing documentation, correspondence between myself and Defendant, I had many conversations with the attorneys at The Law

Offices of Todd M. Friedman, P.C, including with Todd Friedman, Adrian Bacon, and several staff members regarding the case and the strength of the claims we alleged in the Complaint. All in all, I have spent approximately 60 hours on this litigation.

8. I stayed in touch with my attorneys, by phone and email on a regular basis, and was fully aware of all significant developments in the case as I took the duty and privilege of acting as a Class Representative in this case very seriously. Throughout the life of this case, I have had dozens calls with my attorneys and have exchanged several dozen emails as well. I worked with my attorneys throughout the case, assisting in drafting the complaint by providing information and documentation to support the claims. I also regularly discussed the case with my attorneys when they had questions, and also participated in person the mediation and stayed overnight, along speaking with my attorneys about the status of settlement discussions. I was therefore very much involved in the settlement process, consulting with my attorneys on the facts and terms relevant to the settlement, and reviewing and signing the settlement documents once we reached a deal.

D. I was intimately involved with the class action lawsuit performing the duties discussed above. While I didn't keep accurate time records, I was in regular contact with my attorneys regarding the status of the case and ways in which I could help move the case towards settlement. I expended considerable time on the issues presented during the litigation and in the settlement process and took a substantial risk that was not taken by other members of the Class.

- 10. I have agreed to a class settlement in this case with Defendant. I have reviewed the Complaint, the Settlement Agreement, and other related materials, and have discussed their contents with my attorneys.
- 11. I believe that the settlement achieved is a fair result for the Class, and is fair and reasonable, considering the potential risks of going forward with litigation, especially in light of some of

2

the defenses that Defendant has raised with regards to its defenses to certifying the case as a class action, and its arguments regarding its courses being of some value to the consumers. While I disagree with these defenses, I recognize that the Court or a Jury may find them compelling. In determining that this Settlement is fair and reasonable, I considered these defenses, and listened to the advice of my counsel, in giving them due weight.

12. The settlement achieved was for a total sum of \$100,000,000. I am aware that this amount is potentially a greater amount of money than the Class Members would receive if we won the case. In light of the serious risks of going forward with this case, the chance that we did not win on class certification, the likelihood of appeals, the potential for lengthy delay, and the ultimate uncertainty of recovery through litigation of the claims brought under employment laws, I believe the settlement is fair and reasonable and represents a fair result for Class Members.

13. I understand that by settling this case, both Parties were able to avoid costly and time consuming additional litigation and trial.

14. To my knowledge, I have no interest that is not in line with the class members. My goal in bringing this case was to ensure that Defendant was made aware of the requirements under the law, and that I could achieve a fair result for the Class Members who I believed were affected by the policies and practices that affected me. I believe that both of these goals have been achieved by this settlement, and I am proud to have been a part of it.

15. I respectfully request the Court approve the Motion for Final Approval and Motion for Attorneys' Fees, Costs and Incentive Award.

16. I do not have any conflicts of interest with any other members of the Class.

17. I have not received compensation of any kind in exchange for the general release of my claims against DoorDash other than the proposed service award I would receive as part of this settlement.
